Attention: Mr. Jeremy Stratton

Subject: **PHASE I ENVIRONMENTAL SITE ASSESSMENT**
232 E Broad Street
Griffin, Spalding County, Georgia
NOVA Project Number 10102-3026015

Dear Mr. Jeremy Stratton:

NOVA Engineering and Environmental, LLC (**NOVA**) has completed the authorized Phase I Environmental Site Assessment (Phase I ESA) for the property located at 232 E Broad Street in Griffin, Spalding County, Georgia. The work was performed in general accordance with NOVA Proposal Number 10102-3026015P, dated January 16, 2026.

The Phase I ESA work was performed in general accordance with ASTM International *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, Designation: E1527-21* unless otherwise stated herein. The attached report presents our understanding of the project information, a description of the environmental consulting services provided by NOVA, and our findings and conclusions.

We appreciate your selection of NOVA and the opportunity to be of service on this project. If you have any questions, or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,
NOVA Engineering and Environmental, LLC

ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 321.10 of 40 C.F.R. § 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

TRIS	Toxic Chemical Release System
TSCA	Toxic Substances Control Act
USGS	United States Geological Survey
UST	Underground Storage Tank
VCP	Voluntary Cleanup Program
VEC	Vapor Encroachment Condition

1.0 SUMMARY

We have performed a *Phase I Environmental Site Assessment* (ESA) in conformance with the scope and limitations of ASTM International Practice E1527-21 for the approximately 0.72-acre property located at 232 E Broad Street in Griffin, Spalding County, Georgia (the "Subject Property"). Any exceptions to, or deletions from, this practice are described in Section 9.0 of this report.

This summary is provided for convenience and should not be substituted for review of the full report, including all attachments as provided herein.

This assessment has revealed no evidence of Recognized Environmental Conditions in connection with the Subject Property except for the following:

1.1 RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed evidence of one (1) off-site issue resulting in a Recognized Environmental Condition (REC) in connection with the Subject Property:

- NOVA considers the long term use of the northern adjoining property (up to sidegradient) as a railroad and freight yard since at least 1890 as a REC for the Subject Property. See Section 6.3.2 Past uses of Adjoining Properties for further discussion.

1.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

No on-site or off-site issues or conditions were identified during the site reconnaissance performed by NOVA personnel or in the review of regulatory databases that resulted in Controlled Recognized Environmental Conditions (CRECs) at the Subject Property.

1.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed evidence of one (1) on-site issue resulting in a *Historical Recognized Environmental Condition* (HREC) in connection with the Subject Property:

- The Subject Property formerly operated one (1) petroleum Underground Storage Tank (UST) that was removed from the ground in March 1998. A Clean Closure Report was submitted to the state and a subsequent No Further Action status was given to the Subject Property in October 1998. See Section 6.2.1 Subject Property for further discussion.

1.4 BUSINESS ENVIRONMENTAL RISKS

No on-site or off-site issues or conditions were identified during the site reconnaissance performed by NOVA personnel, or in the review of regulatory databases that resulted in Business Environmental Risks (BERs) at the Subject Property.

1.5 VAPOR MIGRATION

Impacted soil/groundwater resulting in vapor migration conditions that require further assessment have not been identified at the Subject Property at this time.

1.6 DE MINIMIS CONDITIONS

No de minimis environmental conditions were identified.

1.7 RECOMMENDATIONS

Based on the findings, opinions, and conclusions of this Phase I ESA, NOVA recommends soil and groundwater sampling be performed to assess the potential impact from the identified REC.

1.8 SIGNIFICANT ASSESSMENT DATES

The user viability dates for this report are based on the completion dates in the following table:

Activity	Completion Date
Site Visit	February 26, 2026
Interviews	February 12, 2026
Regulatory File Review	February 13, 2026
Environmental Lien Search	Not provided by Client

2.0 INTRODUCTION

2.1 GENERAL

NOVA Engineering and Environmental, LLC (**NOVA**) was authorized by City of Griffin to perform a Phase I ESA for the approximately 0.72-acre property located at 232 E Broad Street in Griffin, Spalding County, Georgia (the "Subject Property").

2.2 PURPOSE

This Phase I ESA was performed to identify *recognized environmental conditions* (RECs) associated with the Subject Property. The Phase I ESA is intended to constitute "all appropriate inquiry" into the previous ownership and uses of the Subject Property consistent with good commercial and customary practices as defined by the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) (42 USC § 9601). In addition, the Phase I ESA is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations to CERCLA liability.

This Phase I ESA addresses existing and past uses and conditions relating to the Subject Property. NOVA makes no representation regarding the future or potential use of the Subject Property except for those items explicitly stated in this report.

This assessment was conducted in general accordance with the scope and limitations of ASTM Standard E-1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (the Standard Practice) unless otherwise stated herein. Our assessment, conclusions and recommendations are based on site conditions, observations, interviews, and a review of readily available information, as they existed at the time of our review.

2.3 SCOPE OF SERVICES

Phase I ESAs are described as general characterizations of environmentally sensitive activities and conditions that are identifiable through practically reviewable information and visual, non-invasive observations for the purpose of identifying RECs. The Standard provides the following definition for a REC:

- **REC** – (1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3)

the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.

The Standard also provides the following definitions for a Historical Recognized Environmental Condition (HREC), a Controlled Recognized Environmental Condition (CREC) and a business environmental risk (BER):

- **HREC** – a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A Historical Recognized Environmental Condition is not a recognized environmental condition.
- **CREC** – a Recognized Environmental Condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).
- **BER** – a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice.

These terms are not intended to include ***de minimis conditions*** which are conditions related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a Recognized Environmental Condition, a Historical Recognized Condition, or a Controlled Recognized Environmental Condition.

In addition, the potential for ***vapor migration*** in the subsurface discussed in this assessment should not be construed as the identification of Vapor Encroachment Conditions (VEC) defined by ASTM 2600.

Services performed for this project include a process involving and/or considering the following:

- Review of available environmental lists published by federal and state agencies (i.e., regulatory database report) in an attempt to identify environmentally sensitive activities (past or present) on the subject and adjoining properties.

- Review of physical characteristics of the Subject Property through field observations and a review of readily available documents including geologic and topographic maps, aerial photographs, and historic maps.
- Reconnaissance of reasonably accessible portions of the Subject Property and surrounding areas to visually identify obvious present or past conditions or activities that may pose an environmental threat to the Subject Property.
- Interview of local regulatory agency personnel and others knowledgeable about the history of the Subject Property.
- A qualitative hydrogeological evaluation of the Subject Property and vicinity using both published topographic maps and field observations.
- Preparation of this report summarizing our services, findings, and conclusions.

A site vicinity map, topographic map, aerial photograph, site photographs, regulatory database report, regulatory and/or government agency correspondence, and other supporting documents and information are included as appendices to this report.

The sampling and testing of soil, air and/or other materials is beyond the scope of this study. The identification of asbestos containing materials (ACM), radon, vapor encroachment, lead based paint (LBP), lead in drinking water, wetlands, Waters of the United States, Waters of the State, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, rare or endangered species, air quality, noise impacts, biological agents and mold are also beyond the scope of this Phase I ESA. No implication is intended as to the relative importance of these additional environmental items, and this list of items is not intended to be all inclusive.

2.4 ASSUMPTIONS

The information gathered during this assessment was information that was “practically reviewable.” This is, by definition, information that is provided by the source in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary analysis of irrelevant data. The form of the information is such that the environmental professional can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the property or a geographic area in which the property is located (such as records that are sorted chronologically) are not considered practically reviewable.

In addition, for large databases with numerous records it is common for an unmanageable number of sites to be identified, even within a smaller geographic area such as a zip code. In these cases when so much data is generated that it cannot be feasibly reviewed for its impact on the property, it is considered not practically reviewable.

The information provided herein is that which is publicly available. Information that is publicly available means that the source of the information allows access to the information by anyone upon request at a reasonable time and cost.

2.5 LIMITATIONS AND EXCEPTIONS

NOVAhas performed a Phase I ESA in accordance with the Standard Practice, which is a limited inquiry into a property's environmental status and is not sufficient to discover every potential source of environmental liability or environmental impact, if any, of the property to be evaluated. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property, and this practice recognizes reasonable limits of time and cost.

The appropriate level of inquiry is variable. Not every property will warrant the same level of assessment. Consistent with good commercial or customary practices, the appropriate level of environmental site assessment will be guided by the type of property subject to assessment, the expertise and risk tolerance of the Users, and the information developed in the course of the inquiry.

NOVA's findings, opinions, and conclusions are based on information which is reasonably ascertainable from standard sources at the time of the assessment through site reconnaissance, visual assessment of surficial conditions, records review, interviews and other standard investigative techniques used in the industry at this time. It is possible that other information exists or may subsequently become known that may impact or change the site assessment after NOVA's services are complete.

In conducting this Phase I ESA and preparing the ESA report, NOVAreviewed, interpreted, and relied upon information provided by others, including, but not limited to individuals, government authorities, subcontractors, and other entities. NOVA has not performed an independent evaluation of the accuracy or completeness of such information.

NOVA’s assessment represents our professional opinion, only. Therefore, NOVA cannot, under any circumstances, make a statement of warranty or guarantee, expressed or implied, that RECs, environmental impairment, or environmental impacts are limited to those that are discovered while we are performing the Phase I ESA.

Specific limitations, exceptions, and/or data gaps/failures related to this ESA are as follows:

- The use of the Subject Property was not identified back to the Subject Property's first developed use. The Subject Property appears to have been the County Court house in an 1860 sanborn map.
- Previous property owners, tenants, and/or site managers were not contacted for interviews regarding the Subject Property's history and use.

NOVA's professional opinion regarding the significance and/or materiality of these limiting conditions, exceptions, and/or data gaps/failures is provided in Section 9.0.

2.6 SPECIAL TERMS AND CONDITIONS

The Terms and Conditions for this Phase I ESA were set forth in NOVA's Proposal Number 10102-3026015P, dated January 16, 2026. No additional special terms and/or conditions were established for this Phase I ESA.

2.7 USER RELIANCE

NOVA's Phase I ESA report, along with the findings and conclusions contained in the report, either in completed form, summary form, or by extraction, is prepared, and intended, for the sole use of the Client and therefore may not contain sufficient information for other purposes or parties.

The contents of NOVA's report will continue to be the property of NOVA. NOVA's report may not be disclosed to, used by, or relied upon by, any person or entity other than the Client without the express written consent of NOVA. A reliance letter will be issued to other related parties as discussed with and agreed to by NOVA.

Authorization for disclosure to a third party or authorization for third-party reliance on a final report will be considered by NOVA upon the written request of the Client. NOVA reserves the right to deny authorization to allow disclosure or reliance of NOVA's report to third parties.

3.0 SITE DESCRIPTION

3.1 LOCATION AND LEGAL DESCRIPTION

The Subject Property consists of an approximately 0.72-acre parcel located at 232 E Broad Street in Griffin, Spalding County, Georgia. According to the Spalding County Geographic Information System (GIS) database, the Subject Property is identified as Parcel ID 014 35005.

The legal description for the parcel is reproduced below, and available property appraiser records are included in the Appendix:

- ALL THAT TRACT OR PARCEL OF LAND lying and being in Land Lot 145 of the 2nd District or 1001 Georgia
  Militia District, City of Griffin, Spalding County, Georgia

Property Characteristics	
Subject Property Size	One (1) parcel totaling approximately 0.72 acres.
Parcel Number	014 35005
Subject Property Street Address	232 E Broad Street
Subject Property City, State, Zip	Griffin, Georgia 30223
Current Use of Subject Property	Vacant
Current Occupant(s)	N/A
Year Constructed	~1860
Access to the Subject Property	Bordered by East Broad Street to the north and N 5th Street to the east.
Subject Property Coordinates	The approximate latitude and longitude coordinates of the Subject Property are 33.2495° north and 84.2608° west, respectively.

3.2 SUBJECT PROPERTY VICINITY GENERAL CHARACTERISTICS

The vicinity of the Subject Property is generally developed with commercial and light-industrial land uses, and it is bordered by the following:

DIRECTION	LAND USE DESCRIPTION/OBSERVATIONS
NORTH	East Broad Street, beyond which is the Norfolk Southern Griffin Yard (232 East Broad Street)

DIRECTION	LAND USE DESCRIPTION/OBSERVATIONS
EAST	5th Street, beyond which is a parking lot associated with a multi-tenant retail lot (Broad Street Mill, 324 East Broad Street)
SOUTH	An undeveloped, vacant grassed lot
WEST	A vacant single story commercial building (224 East Broad Street)

3.3 CURRENT USE OF THE PROPERTY

The Subject Property is currently a vacant former Spalding County jail.

3.4 DESCRIPTIONS OF PROPERTY IMPROVEMENTS

The Subject Property is currently developed with a 32,000-square foot, two (2) story office building that was constructed in approximately 1860. The Subject Property contains associated asphalt paved parking to the west and east of the building. The Subject Property also contains green space including trees, grass, and low-growing vegetation.

The Subject Property is bordered by East Broad Street to the north and N 5th Street to the east.

The Subject Property contains several storm water drop inlets and storm water catch basins located along East Broad Street and S 5th Street. Public utilities are currently connected to the Subject Property. Electricity and potable water and sewer services are provided to the Subject Property by Griffin Power and the City of Griffin, respectively.

Select photographs of the Subject Property, taken by NOVA during the site reconnaissance activities (see Section 7.0), are included as Appendix B.

4.0 USER PROVIDED INFORMATION

The "All Appropriate Inquiries" Final Rule (40 CFR Part 312) requires certain tasks be performed by the User in order to qualify for one of the Landowner Liability Protections (LLPs) to CERCLA liability. Failure to provide this information could result in a determination that all appropriate inquiry is not complete; consequently, fulfillment of these User responsibilities is key to qualification for the available defenses to CERCLA liability.

The User is asked to provide information or knowledge of the following:

4.1 LAND TITLE RECORDS

NOVA was provided a Title Commitment, prepared by Chicago Title Insurance Company, dated October 10, 2025. The Title is, at the Commitment Date, vested in: Spalding County, a political subdivision of the State of Georgia. A copy of the Title Commitment and legal description is attached in the Appendix.

4.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS (AUL)

The Client has stated that they are not aware of any environmental liens or activity and use limitations for the Subject Property. NOVA was provided a Title Commitment, prepared by Chicago Title Insurance Company, dated October 10, 2025. The Title is, at the Commitment Date, vested in: Spalding County, a political subdivision of the State of Georgia. According to the Title Commitment document, Environmental Liens or AULs are not reported for the Subject Property. A copy of the Title Commitment and legal description is attached in the Appendix.

4.3 SPECIALIZED KNOWLEDGE

The Client has stated they do not have any specialized knowledge or experience that is material to recognized environmental conditions in connection with the Subject Property.

4.4 ACTUAL KNOWLEDGE

The Client has stated they do not have any actual knowledge or experience that is material to recognized environmental conditions in connection with the Subject Property.

4.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The Client has stated the sale price of the Subject Property is approximately fair market value and that it is unknown if there has been a valuation reduction due to environmental issues for the Subject Property.

4.6 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The Client has stated they are not aware of any commonly known or reasonable ascertainable information that is material to recognized environmental conditions in connection with the Subject Property.

4.7 OBVIOUS INDICATORS

The Client has stated they are not aware of any obvious indicators of the presence or likely presence of releases or threatened releases at the Subject Property. Obvious indicators are those that are plain or evident, a condition or fact that could not be ignored or overlooked by a reasonable observer while visually or physically observing the property.

4.8 REASON FOR PERFORMING PHASE I ESA

The Phase I ESA is being performed with the understanding that the Client intends to purchase the Subject Property.

5.0 INTERVIEWS

As part of the Phase I ESA, interviews were conducted with select persons familiar with the Subject Property to provide insight into past activities or conditions material to recognized environmental conditions in connection with the Subject Property.

5.1 INTERVIEW WITH OWNER

NOVAinterviewed the Subject Property owner representative, Mr. Jeremy Stratton, Director of Economic Development with the City of Griffin. Mr. Stratton indicated they purchased the property approximately four months ago from Spalding County. The property is currently (2026) vacant. The building has historically been used as a courthouse/jail for over 100 years, and most recently, as a VA office.

Mr. Stratton indicated the Subject Property is connected to Public Utilities (electric, water, and sewer) and solid waste pick up is provided by the City of Griffin. Additionally, he indicated the property utilizes an HVAC system. Mr. Stratton reported he is aware of a former tank on the Subject Property. He indicated the closure of this tank received No Further Action (NFA) status from the state.

Mr. Stratton reported he is unaware of any drinking water wells, or septic tanks on the Subject Property. Mr. Stratton stated he is unaware of any environmental concerns in connection with the Subject Property.

5.2 INTERVIEWS WITH SITE MANAGER

See Section 5.1 Interview with Owner.

5.3 INTERVIEWS WITH OCCUPANTS

See Section 5.1 Interview with Owner.

5.4 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

NOVA contacted the City of Griffin Fire Rescue Department via their online submission form on February 10, 2026, to request information related to historical incidents that may have included hazardous substance spills or releases reported for the Subject Property. According to the City of Griffin, as of February 10, 2026, there were no records of incident for the Subject Property.

NOVA contacted the following departments via e-mail on February 10, 2026, to request information related to historical incidents that may have included hazardous substance spills or releases reported for the Subject Property:

- **Georgia Environmental Protection Division (GA EPD) – District Offices:** According to Ms. Mandy Elliott, as of February13, 2026, the District Offices do not have any records related to the Subject Property.
- **GA EPD – Watershed Protection Branch:** According to Ms. Tierra Whiteside, as of February 10, 2026, the Watershed Protection Branch does not have any records related to the Subject Property.
- **GA EPD – Air Protection Branch:** According to Ms. Kerri McCoy, as of February 11, 2026, the Air Protection Branch does not have any records related to the Subject Property.
- **GA EPD – Land Protection Branch**: According to Ms. Shameka Beard, the Land Protection Branch searched for relevant records within the Hazardous Waste Management Program, Underground Storage Tank Management Program (USTMP), Solid Waste Management Program, Surface Mining Management Program, Scrap Tire Management Program, and the Lead-Based Paint & Asbestos Program. As of February 17, 2026, records were found regarding the former onsite USTs. The USTs are discussed further in Section 6.2.1 Subject Property.

5.5 INTERVIEWS WITH OTHERS

None.

6.0 RECORDS REVIEW

6.1 PHYSICAL SETTING SOURCES

6.1.1 Topography

The generally rectangular shaped Subject Property is located within the Griffin South; Griffin North; Orchard Hill; and Luella, Georgia, United States Geological Survey, 7.5-minute series topographic quadrangle map. Topographically, the Subject Property slopes downward from a high point of approximately 970 feet above mean sea level (MSL) in the northwestern portion of the site to approximately 690 feet-MSL in the southeastern portion of the Subject Property.

6.1.2 Site And Area Geology

The Subject Property is located in the Piedmont Geologic Region, a broad northeasterly trending province underlain by crystalline rocks up to 600 million years old. The Piedmont is bounded on the northwest by the Blue Ridge Range of the Appalachian Mountains, and on the southeast by the leading edge of Coastal Plain sediments, commonly referred to as the "Fall Line". Numerous episodes of crystal deformation have produced varying degrees of metamorphism, folding and shearing in the underlying rock. The resulting metamorphic rock types in this area of the Piedmont are predominantly a series of Precambrian age schists and gneisses, with scattered granitic or quartzite intrusions.

Residual soils in the Piedmont region are primarily the product of in-situ chemical decomposition of the parent rock. The extent of the weathering is influenced by the mineral composition of the rock and defects such as fissures, faults and fractures. The residual profile can generally be divided into three zones:

- An upper zone near the ground surface consisting of red clays and clayey silts which have undergone the most advanced weathering,
- An intermediate zone of less weathered micaceous sandy silts and silty sands, frequently described as "saprolite", whose mineralogy, texture and banded appearance reflects the structure of the original rock, and
- A transitional zone between soil and rock termed partially weathered rock (PWR). Partially weathered rock is defined locally by standard penetration resistances exceeding 100 blows per foot.

Boundaries between zones of soil, partially weathered rock and bedrock are erratic and poorly defined. Weathering is often more advanced next to fractures and joints that transmit water, and in mineral bands that are more susceptible to decomposition. Boulders and rock lenses are sometimes encountered within the overlying PWR or soil matrix. Consequently, significant fluctuations in depths to materials requiring difficult excavation techniques may occur over short horizontal distances.

6.1.3 Soils

Based on a review of online web soil survey (WSS) maps published by the United States Department of Agriculture (USDA) for Spalding County, Georgia (survey area data dated September 2, 2025), the Subject Property is primarily underlain by:

- **Cecil-Urban** – The Cecil Urban series consist of very deep, well drained, moderately high to high permeable soils that occur primarily on ridges and slopes of the Piedmont uplands. They are deep to saprolite and very deep to bedrock. Near the type location, the average annual temperature is about 59 to 64 degrees F., and the average precipitation ranges from 44 to 60 inches. Slopes range from 2 to 20 percent.

6.1.4 Groundwater

Groundwater in the Piedmont typically occurs as an unconfined or semi-confined aquifer condition. Recharge is provided by the infiltration of rainfall and surface water through the soil overburden. More permeable zones in the soil matrix, as well as fractures, joints and discontinuities in the underlying bedrock can affect groundwater conditions. The groundwater table in the Piedmont is expected to be a subdued replica of the original surface topography. The Subject Property is located in the Grape Creek watershed, a sub-basin of the Potato Creek watershed. Based on a review of the topographic maps and visual observations, we anticipate the local groundwater to generally flow southeast of the Subject Property toward an unnamed tributary of Grape Creek, which flows further southeast to its confluence with Potato Creek.

The groundwater levels in developed areas can be influenced by leaks from underground water and sewer lines; consequently, the water table may not always mimic site topography and may vary in the future.

6.1.5 Flood Zone Information

Based on a review of the Federal Emergency Management Agency (FEMA) online Flood Insurance Rate Map (FIRM) for the Subject Property (map number 13255C0185D, effective on May 3, 2010), it is located within Zone X. Zone X designates areas that are interpreted to be outside the 0.2 percent (500-year) annual chance floodplain.

6.1.6 Record of Water Wells

A review of the EDR® Physical Setting Source Summary addendum did not identify the presence of water wells at the Subject Property. Furthermore, no active production wells or pump stations were observed at the Subject Property during NOVA's February 26, 2026 site reconnaissance visit (see Section 7.0).

6.2 ENVIRONMENTAL RECORD SOURCES

Environmental Data Resources Inc. (EDR®) of Milford, Connecticut conducted a commercial database search of regulatory databases. This is a review of published governmental records from federal and state environmental regulatory agencies. It was conducted to identify use, generation, storage, treatment or disposal of hazardous substances and petroleum products, and/or release incidents of such materials that may have the potential to impact the Subject Property or nearby sites.

The federal and state/tribal environmental databases obtained from EDR® and reviewed by NOVAwere generated in general accordance with the ASTM E1527-21 guidelines for standard environmental record sources for this assessment. Such reports are typically used to review the potential environmental impact of activities at the Subject Property or nearby sites. The full EDR® database search report for this project is included in Appendix C.

In addition to the above standard databases, a number of non-standard/supplemental databases were reported by EDR® and reviewed by NOVA as part of this investigation. Further details regarding database names, search radii, and responsible agencies are included in the EDR® report attached in Appendix C, Regulatory Records Documentation.

Standard Environmental Records

FEDERAL DATABASE	SEARCH DISTANCES
Federal NPL site list	1.0 mile
Federal Delisted site list	0.5 mile
Federal CERCLIS list	0.5 mile
Federal CERCLIS NFRAP list	0.5 mile
Federal RCRA CORRACTS facilities list	1.0 mile
Federal RCRA non-CORRACTS TSD facilities list	0.5 mile
Federal RCRA generators list	Property and adjoining properties
Federal Institutional control/engineering control registries	Property only
Federal ERNS List	Property only

STATE / TRIBAL DATABASE	SEARCH DISTANCES
State and tribal lists of hazardous waste sites identified for investigation for remediation:	
• State and tribal equivalent NPL	1.0 mile
• State and tribal equivalent CERCLIS	0.5 mile
State and tribal landfill and/or solid waste disposal site lists	0.5 mile
State and tribal equivalent leaking storage tank lists	0.5 mile
State and tribal registered storage tank lists	Property and adjoining properties
State and tribal Institutional control / engineering control registries	Property only
State and tribal voluntary cleanup sites	0.5 mile
State and tribal Brownfield sites	0.5 mile

6.2.1 Subject Property

The Subject Property was listed in the regulatory databases included in the EDR Report. The current Subject Property address, 232 E Broad Street, was identified as a Underground Storage Tank (UST) facility and a Leaking Underground Storage Tank (LUST) facility.

According to the EDR report, the Subject Property formerly operated one (1) petroleum UST that was removed from the ground in March 1998. The site is listed as Clean Closure and No Further Action (NFA) status in October 1998. No further information is provided by the EDR report.

NOVA received archived files from the Georgia Environmental Protection Department (EPD) Land Branch UST office on March 5, 2026. According to a Memorandum (dated October 27, 1998) from KEMRON regarding an NFAR for the Subject Property, a 10,000-gallon gasoline UST was removed from the site on March 26, 1998. Composite soil closure samples were collected from beneath each end of the UST and from beneath the dispenser. The samples were analyzed for Total Petroleum Hydrocarbons (TPH), Polycyclic aromatic hydrocarbon (PAH), and Benzene, Toluene, Ethylbenzene, Xylenes (BTEX). All samples were reported to be below detection levels (BDL). A technical review was requested for concerns of the TPH levels; however, no elevated levels were reported after the investigation. A subsequent NFA letter was issued by the state on October 27, 1998.

Based on the Clean Closure report and subsequent NFA letter from the state, NOVA considers this listing to be a HREC for the Subject Property.

6.2.2 Adjoining Sites

Adjoining sites have a border which is contiguous or partially contiguous with that of the Subject Property, or that would be contiguous or partially contiguous with that of the Subject Property but for a street, road or other public thoroughfare separating them.

No adjoining sites were identified in the EDR® Report.

6.2.3 Surrounding Area Sites

Two (2) regulatory sites were identified in the EDR® Report within the specified search distances relative to the Subject Property.

SITE NAME/ADDRESS	DATABASES	DISTANCE	UP GRADIENT	SIDE GRADIENT	DOWN GRADIENT	DIFFERENT DRAINAGE BASIN
City of Griffin/ 231 East Solomon Street	UST			X		

The City of Griffin facility was formerly located at 231 East Solomon Street, approximately 135-feet to the south in a side to down-gradient relative position to interpreted groundwater flow direction. The site appeared on Sanborn maps as an auto body repair shop/filling station from the late 1940s. According to the EDR report, the former auto service facility operated seven (7) petroleum USTs installed in 1986. According to the report, the USTs have been closed-in-place. No date of closure reports or additional information was provided by the EDR report. Based on down-gradient relative position to interpreted groundwater flow direction (farther southeast), the City of Griffin site is not considered a REC.

SITE NAME/ADDRESS	DATABASES	DISTANCE	UP GRADIENT	SIDE GRADIENT	DOWN GRADIENT	DIFFERENT DRAINAGE BASIN
Fire Station One/120 N 6tth Street & City of Griffin Fire Department/ 201 East Solomon Street	UST	320 feet to the southwest		X		

Fire Station One is listed at 120 N 6th Street. NOVA believes this property is likely misplotted on the EDR Radius Report. Historical records identify the associated address as the location of the City of Griffin's Light, Water and Sewer Department from at least 1900 through approximately 2012, before the structure was razed by 2015. The City of Griffin Fire Department, located approximately 320 feet to the southwest, shares the physical addresses of 102 North 6th Street and 201 East Solomon Street. Due to the distance and relative position to groundwater flow direction, NOVA does not consider this listing to be a REC for the Subject Property.

Seventy (70) additional sites were identified in the EDR® Report within the specified search distances that are downgradient or in different drainage basins relative to the Subject Property (please refer to Appendix C, Regulatory Records Documentation). Due to these regulatory sites' distance, separation from the Subject Property by a significant area of considerably higher topography, and/or interpreted groundwater flow direction, these regulatory sites are not considered RECs in connection with the Subject Property at this time.

6.2.4 Orphan Sites

One (1) "unmappable" or "orphan" site, which are facilities that could not be plotted due to errors or missing information in the regulatory records, was identified in the EDR® database report. It is our opinion that this orphan facility listed was not an adjoining site or located upgradient within the respective search distances from the Subject Property based on the information provided and, in our opinion, is not considered a REC in connection with the Subject Property.

6.3 HISTORICAL USE INFORMATION

NOVA attempted to conduct a review of previous reasonably ascertainable environmental reports, historical maps, and aerial photographs to gain an understanding of the development history of the Subject Property. Available historical records reviewed by NOVA were used to review the potential environmental impact of activities on the integrity of the Subject Property.

6.3.1 Past Uses of Subject Property

Based on User provided information and a review of available records including aerial photographs, topographic maps, city directories, and fire insurance maps, the previous uses of the Subject Property are described in the table below in intervals where meaningful property changes were noted.

Date	Description	Historical Source
1890 - 1962	The Subject Property is depicted as the Spalding County Court House. In 1900, an additional jail building is depicted to the south of the current (2026) building. In 1949, the additional jail building is depicted as office space.	Aerial Photograph Fire Insurance Maps
1971/1973 - 2005	The former jail/office building appears to have been razed. A commercial building with an associated parking area appears to the south of the courthouse building. The Subject Property is depicted gently sloping downward from the northwest to the southeast.	Aerial Photograph Topographic Map City Directory
2010 - 2026	The southern commercial building appears to have been razed. The southern portion of the Subject Property appears to be undeveloped grassed land and a parking area. In 2015, the parking area appears to be razed. The Subject Property reflects current (2026) conditions.	Aerial Photograph Topographic Map City Directory Interviews Property Tax Files Google Earth

6.3.2 Past Uses of Adjoining Properties

Based on a review of available records including aerial photographs, topographic maps, city directories, and fire insurance maps, the previous uses of the adjoining properties are described in the table below.

Date	Description	Historical Source
1890 - 1925	Adjoining properties to the west are depicted as single and double-story dwellings and associated outbuildings. 5th Street is depicted adjoining along the eastern border of the Subject Property. East Broad Street is depicted adjoining along the northern border of the Subject Property, beyond which is a Freight house and an associated railroad (side to up-gradient). In 1895, the railroad yard/freight house is depicted as owned by Central Railroad of Georgia. In 1909, the eastern adjoining property (down-gradient) appears to be developed with A.F. Gossett & Sons Seed and Fertilizer (1909-1973).	Fire Insurance Maps
1941 - 1973	An auto body repair and paint shop with an associated filling station appears adjoining to the south (side to down-gradient) from at least 1941 through 1961. The western adjoining property appears to be a converted office space (former residence). Electrical transformers are depicted adjoining to the west, south of the converted office building.	Aerial Photograph Topographic Map Fire Insurance Maps City Directory
1981 - 1993	The eastern adjoining A.F. Gossett & Sons Seed and Fertilizer industrial plant appears to have been razed. The eastern adjoining property beyond the roadway appears to be an undeveloped vacant lot.	Aerial Photograph Topographic Map City Directory
1999 - 2013	The western adjoining transformers appear to have been razed and redeveloped as two commercial buildings. In 2010, the eastern adjoining property appears to be a parking lot.	Aerial Photograph Topographic Map City Directory Google Earth

Date	Description	Historical Source
2015 - 2026	The southern adjoining roadway and buildings appear to have been razed. The southwestern commercial buildings appear to have been razed. The southern adjoining properties are undeveloped, grassed land, and reflect current (2026) conditions.	Aerial Photograph Topographic Map City Directory Interviews Google Earth

A railroad is depicted adjoining to the Subject Property in an upgradient to sidegradient relative position to groundwater flow direction since at least 1890. The long term use of the adjoining property as a railroad has the potential for contamination in soils from the breakdown and corrosion of railroad ties overtime. Due to the proximity of the railroad to the Subject Property, NOVA considers the historical use of the northern adjoining property as a railroad to be a REC for the Subject Property.

An auto body repair/paint shop/filling station appears adjoining to the south (side to downgradient) from at least 1941 through 1961. The building appears from approximately 1941 through 2013. From 2008 through 2013, the building appears to be vacant. Based on the side to downgradient relative position to groundwater flow direction, NOVA does not consider this facility to be a REC.

6.3.3 Past Uses of Surrounding Properties

Based on a review of available records including aerial photographs, topographic maps, city directories, and fire insurance maps, the previous uses of the surrounding properties are described in the table below.

Date	Description	Historical Sources
1890 - 1973	Surrounding properties appear to be an urban mixture of residential, commercial, and industrial.	Aerial Photograph Topographic Map Fire Insurance Maps City Directory

Date	Description	Historical Sources
1981 - 2026	The surrounding properties appear to be an urban mixture of commercial and light-industrial properties in the downtown City of Griffin area.	Aerial Photograph Topographic Map City Directory Google Earth

6.3.4 Previous Environmental Reports on Subject Property

The following environmental studies have previously been performed on the Subject Property:

KEMRON – *Memorandum to NFAR, Spalding County Old Jail Facility, 232 East Broad Street, dated October 27, 1998* - According to the report, a 10,000-gallon gasoline UST was removed from the site on March 26, 1998. Composite soil closure samples were collected from beneath each end of the UST and from beneath the dispenser. The samples were analyzed for Total Petroleum Hydrocarbons (TPH), Polycyclic aromatic hydrocarbon (PAH), and Benzene, Toluene, Ethylbenzene, Xylenes (BTEX). All samples were reported to be below detection levels (BDL).

Georgia Environmental Protection Department (EPD) Underground Storage Tank Management Program (USTMP) - *No Further Action Required, Spalding County Old Jail Facility, 232 East Broad Street, dated October 27, 1998* - No Further Action Status was granted to the Subject Property.

Copies of the documentation are attached in the Appendix.

6.3.5 Previous Environmental Reports on Surrounding Sites

Previous environmental reports on surrounding sites were not provided to NOVA for review.

7.0 SUBJECT PROPERTY RECONNAISSANCE

7.1 METHODOLOGY AND LIMITING CONDITIONS

Ms. Nicole Camarda, a NOVA Project Geologist, and Mr. Curtis Moses, a NOVA Project Scientist, conducted a site visit on February 26, 2026. NOVA was unaccompanied during the site visit, which consisted of an initial site reconnaissance, a walk along the perimeter of the Subject Property, and a walk along the immediate surrounding area. Additionally, an area reconnaissance was conducted as a driving tour to identify facilities within specified regulatory search distances listed within the previously referenced EDR® report.

The site reconnaissance was performed in an attempt to identify observed obvious indications of present or past activities that may have caused a significant environmental impact(s) to the Subject Property. Select photographs of the Subject Property, taken by NOVAduring the site reconnaissance, are included in Appendix B.

7.2 OBSERVATIONS

Site observations and conditions identified during NOVA's site reconnaissance are summarized as follows:

7.3 INTERIOR AND EXTERIOR OBSERVATIONS

7.3.1 Hazardous Substances and Petroleum Products Containers (in Connection with Identified Uses)

None observed.

7.3.2 Storage Tanks

None observed.

7.3.3 Odors

None noted.

7.3.4 Pools of Liquid

None observed.

7.3.5 Drums

None observed.

7.3.6 Hazardous Substances and Petroleum Products Containers (Not Necessarily in Connection with Identified Uses)

None observed.

7.3.7 Unidentified Substance Containers

None observed.

7.3.8 PCBs (Electrical Transformers):

The EDR®search found no PCB waste handlers within the site area. A pole-mounted transformer is located in the southwestern corner of the Subject Property. Pole-mounted transformers are located along the northern and eastern borders of the Subject Property. The transformers appeared to be in good condition, and no stains or leaks were noted. Based on our past conversations with Griffin Power, the electrical utility companies generally accept responsibility for their equipment and any releases or spills associated with their intended use.

7.4 INTERIOR OBSERVATIONS

7.4.1 Heating and Cooling

Central electric air conditioning and natural gas heating systems were observed.

7.4.2 Stains or Corrosion

Staining was observed in dilapidated areas of the building from past water damage.

7.4.3 Drains and Sumps

A sump pump was observed in a crawl spaces basement, accessible from the exterior of the building.

7.5 EXTERIOR OBSERVATIONS

7.5.1 Pits, Ponds, and Lagoons

None observed.

7.5.2 Stained Soil or Pavement

None observed.

7.5.3 Stressed Vegetation

None observed.

7.5.4 Solid Waste

Minor debris was observed throughout the building consisting of fallen pieces of ceiling, walls, and broken flooring.

7.5.5 Waste Water (including Storm Water)

Several storm water drop inlets and storm water catch basins were observed along East Broad Street and S 5th Street.

7.5.6 Wells

None observed.

7.5.7 Septic Systems

None observed.

7.5.8 Surface Water

None observed.

7.6 OTHER OBSERVATIONS

A cell tower was observed on the southwestern corner of the Subject Property building.

8.0 FINDINGS, OPINIONS AND CONCLUSIONS

NOVA has performed a Phase I ESA in general conformance with the scope and limitations of ASTM Practice E1527-21 for the approximately 0.72-acre property located at 232 E Broad Street in Griffin, Spalding County, Georgia.

Findings, opinions, conclusions, and recommendations reported herein are based on information obtained during the course of our studies and upon our experience. Information provided in this report is relevant to the dates of our site work and should not be relied on to represent conditions at substantially later dates or locations not investigated.

This assessment has revealed no evidence of Recognized Environmental Conditions in connection with the Subject Property except for the following:

8.1 RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed evidence of one (1) off-site issue resulting in a Recognized Environmental Condition (REC) in connection with the Subject Property:

- NOVA considers the long term use of the northern adjoining property (up to sidegradient) as a railroad and freight yard since at least 1890 as a REC for the Subject Property. See Section 6.3.2 Past uses of Adjoining Properties for further discussion.

8.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

No on-site or off-site issues or conditions were identified during the site reconnaissance performed by NOVA personnel or in the review of regulatory databases that resulted in Controlled Recognized Environmental Conditions (CRECs) at the Subject Property.

8.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed evidence of one (1) on-site issue resulting in a *Historical Recognized Environmental Condition* (HREC) in connection with the Subject Property:

- The Subject Property formerly operated one (1) petroleum Underground Storage Tank (UST) that was removed from the ground in March 1998. A Clean Closure Report was submitted to the state, and a subsequent No Further Action status was given to the Subject Property in October 1998. See Section 6.2.1 Subject Property for further discussion.

8.4 BUSINESS ENVIRONMENTAL RISKS

No on-site or off-site issues or conditions were identified during the site reconnaissance performed by NOVA personnel, or in the review of regulatory databases that resulted in Business Environmental Risks (BERs) at the Subject Property.

8.5 VAPOR MIGRATION

Impacted soil/groundwater resulting in vapor migration conditions that require further assessment have not been identified at the Subject Property at this time.

8.6 DE MINIMIS CONDITIONS

No de minimis environmental conditions were identified.

8.7 RECOMMENDATIONS

Based on the findings, opinions, and conclusions of this Phase I ESA, NOVA recommends soil and groundwater sampling be performed to assess the potential impact from the identified REC.

8.8 REGULATIONS THAT MAY APPLY

8.8.1 General

During construction, we recommend that grading and excavation be monitored by an environmental professional. If unanticipated conditions are encountered in the future, we recommend consultation with NOVA and your environmental attorney regarding appropriate actions.

For convenience in discussing the environmental concerns at this site, we have provided a brief summary of the environmental regulations that we believe are applicable based on our experience with similar projects. To obtain a detailed explanation of Georgia's environmental laws, rules and regulations, we recommend consultation with an environmental attorney.

8.8.2 Brownfield Program

Georgia's Hazardous Site Reuse and Redevelopment Act (HSRRA), commonly referred to as the Brownfields Program, is a voluntary program that can provide a Prospective Purchaser with Limitation of Liability (LOL) benefits and protections for properties with "preexisting releases", including both HSI and non-HSI properties.

In summary, in exchange for remediation of soil contamination that is above applicable residential or commercial Risk Reduction Standards (RRS), the Limitation of Liability provides protection from:

- Groundwater Impacts
- Third Party Liability
- Regulatory Changes

The Limitation of Liability runs with the land to future owners, so long as they are neither a previous owner nor a contributor to release at the property.

An additional financial benefit is the ability to deduct many of the costs incurred to obtain the Limitation of Liability from the tax bill for a period of up to 10 years or until the costs are recovered. This time frame can be extended for up to 15 years if the construction or improvements on the property commenced, then ceased for at least 180 days, then resumed.

Changes (HB 1102, effective May 1, 2012) now allow a Prospective Purchaser to submit his Brownfields Application, accompanied by a $3,000 application review fee and a Corrective Action Plan (CAP), up to 30 days after taking title to the property.

The CAP includes soil and groundwater testing performed as part of the initial Phase II Environmental Site Assessment that identified the “preexisting releases” that qualify the Subject Property and the Prospective Purchaser for the Brownfields Program. The CAP also provides a sampling and remediation plan to:

- Further delineate the soil and groundwater contamination on the Subject Property,
- Determine the groundwater flow direction,
- Remediate soils with concentrations greater than the appropriate RRS, and
- Manage impacted soil and groundwater during site construction and improvement.

The CAP is then implemented, and the supplemental investigation results and the remedial actions taken are documented in a Compliance Status Report (CSR). The CSR also certifies that the soils at the Subject Property meet the appropriate residential or commercial RRS. Following review and approval of the CSR, the GAEPD subsequently issues the Limitation of Liability.

The approved CAP allows impacted soils that are less than the Type I or Type II Risk Reduction Standards (residential standards) to be reused on-site. The CAP does not require groundwater remediation.

The approval of the CAP confers a provisional limitation of liability upon the prospective purchaser, contingent upon implementation of the approved CAP and submittal of a Compliance Status Report (CSR) that certifies compliance with the appropriate risk reduction standard for soil and the source material.

Completion of a CSR will require that additional soil sampling and analysis be performed within the next three (3) years, either prior to or during construction.

9.0 DEVIATIONS AND DATA GAPS

Deletions or substantial deviations from the ASTM E1527-21 standard practice were not noted. Data gaps include the following:

- The use of the Subject Property was not identified back to the Subject Property's first developed use. The Subject Property appears to have been the County Court house in a 1860 sanborn map.
- Previous property owners, tenants, and/or site managers were not contacted for interviews regarding the Subject Property's history and use.

However, it is our professional opinion that these data gaps are not significant, and do not impact the ability to identify RECs, or impact the findings or conclusions of this report.

10.0 ADDITIONAL SERVICES

NOVA conducted an Asbestos-Containing Materials Survey and a Lead-Based Paint Survey in conjunction with the Phase I ESA. These reports are submitted under a separate cover.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/26/2025 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Natural Resources' Hazardous Site Inventory.

A review of the SHWS list, as provided by EDR, and dated 07/01/2025 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Natural Resources' Underground Storage Tank Database.

A review of the UST list, as provided by EDR, and dated 08/18/2025 has revealed that there are 14 UST sites within approximately 0.25 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/30/2025 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 16 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 15 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 E MANIFEST site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste.

EXECUTIVE SUMMARY

Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
GRIFFIN GAS LIGHT AN	314 W COLLEGE ST	SW 1/2 - 1 (0.543 mi.)	U75	171

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste

HOOTEN & ROGERS AUTO BODY (Continued) **1004687463**

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/26/2025

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/26/2025

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: Hazardous Site Inventory

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

NON HSI: Non-Hazardous Site Inventory

This list was obtained by EDR in 1998 and contains property listings that have reported contamination of soil or groundwater under the Georgia Hazardous Site Response Act (HSRA). These sites were not placed on the Georgia Priority list (Hazardous Site Inventory or HSI) because their hazard evaluation scores did not exceed the threshold levels established for sites posing an imminent threat to health or the environment. Disclaimer provided by Rindt-McDuff Associates - the database information has been obtained from publicly available sources produced by other entities. While reasonable steps have been taken to insure the accuracy of the data, RMA does not guarantee the accuracy of the data. No claim is made for the actual existence of pollution at any site. This data does not constitute a legal opinion.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

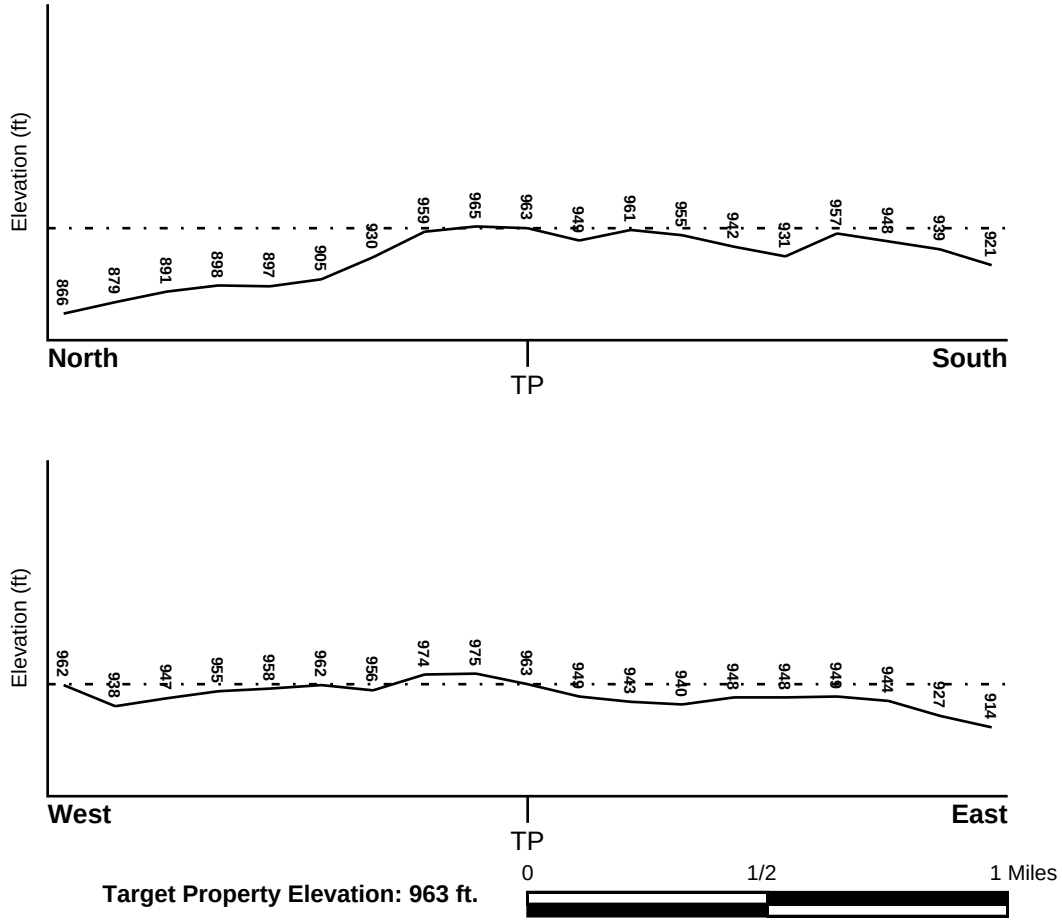

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
GRIFFIN SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Metamorphic Rocks
System:	Pennsylvanian		
Series:	Felsic paragneiss and schist		
Code:	mm1 *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	CECIL
Soil Surface Texture:	sandy clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	7 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 6.50 Min: 4.50
2	7 inches	11 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
3	11 inches	50 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
4	50 inches	75 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
loam
fine sandy loam

Surficial Soil Types: sandy loam
loam
fine sandy loam

Shallow Soil Types: clay
sandy clay
gravelly - loam

Deeper Soil Types: loamy fine sand
sandy loam
weathered bedrock

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR Inquiry # 8252714.4	Contact: Nicole Camarda

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Nova Engineering & Env. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Contact: Nicole Camarda

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Nova Engineering & Env. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: E3E7-480F-B9CF

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Nova Engineering & Env. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 2/25/2026 at 2:38 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

1.0 USER PROVIDED INFORMATION

1.1 LAND TITLE RECORDS

Is Chain-of Title information available for the Subject Property? If yes, please email available information at your convenience.

1.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS (AUL)

Are you aware of any environmental liens or activity and use limitations for the Subject Property? No

1.3 SPECIALIZED KNOWLEDGE

Do you have any specialized knowledge or experience that is material to recognized environmental conditions in connection with the Subject Property?

No

1.4 ACTUAL KNOWLEDGE

Are you aware of any actual knowledge or experience that is material to recognized environmental conditions in connection with the Subject Property?

No

1.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Has there been a valuation reduction for the Subject Property due to environmental issues? NO

1.6 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Are you aware of any commonly known or reasonable ascertainable information that is material to recognized environmental conditions in connection with the Subject Property?

No

1.7 OBVIOUS INDICATORS

Are you aware of any obvious indicators of the presence or likely presence of releases at the Subject Property? Obvious indicators are those that are plain or evident, a condition or fact that could not be ignored or overlooked by a reasonable observer while visually or physically observing the property.

NO

1.8 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

Are you aware of any owner, property manager or occupant information that is material to recognized environmental conditions in connection with the Subject Property?

NO

1.9 REASON FOR PERFORMING PHASE I ESA

What is the reason for performing the Phase I ESA?

Please circle one:

(Purchase) Refinance Lease Other (describe below)

Property History

1. How long have you owned the property? Do you have prior knowledge of property use?
   4 months
2. When was the current building constructed?
   1860
3. Who are the utility providers for electric, gas, and water/sewer?
   Electric, water & sewer - City
4. Please describe the current use of the property including duration.
   - Vacant now ; previous - office first floor and jail
5. Who owned the property prior to your purchase? Please provide contact information if available.
   Spalding County → Lance Griffin 770-550-4091
6. Please provide names and contact information for previous tenants and/or site managers if applicable and available.
   Waypoint 732 W. Broad Street (770) 415-0859
7. What did the property operate as prior to its present use?
   VA offices - bottom floor
   2nd floor - jail
8. Has there been any environmental enforcement action on the property?
   No
9. Have there been previous Phase I or II Environmental Site Assessments? Please provide.
   NO

Phase I ESA – Owner Questionnaire

10. Do you know of any environmental concerns/spills/releases on the property?

NO

11. Are you aware of current and or past herbicide/pesticide use on the property? Please describe.

NO

12. Do you know of any areas of fill on the property?

NO

13. Are/have there been any areas of dumping on the site?

NO

14. Do you know of any sumps/pits/ponds/lagoons? Are they drained? If so, where do they drain to?

NO

15. Is the property connected to city sewer? If not, where is septic system/leach field?

Yes

16. How long has the property been connected to public water/sewer?

17. Does the property produce wastewater (other than storm water)? Where does it discharge to?

NO

18. Where does your storm water drain to (sheet flow, storm drains, and detention ponds)?

19. Are there any surface water bodies (creeks, ponds, wetlands) on-site?

NO

20. How is heating/cooling provided to structures on the property?

HVAC

Area History

1. Are you aware of adjoining properties currently and/or previously operating as filling stations/dry cleaners? SEE Environmental report for 202 E. Solomon

Phase I ESA – Owner Questionnaire

2. Do you know of any environmental concerns/spills/releases from adjoining properties?

NO

Do you know of any of the following on-site? Please provide general locations.

1. Underground or Aboveground Storage Tanks?

YES - NFA → Phase I 202 E. Broad Street Report

2. Hydraulic lifts? Elevators?

NO

3. Septic systems?

NO

4. Wells (monitoring, drinking drywells)?

NO

5. Transformers (pole or pad mounted)? Who owns transformers (power company/facility owned)?

6. Chemical or petroleum storage/use?

No

7. Drums/storage containers?

NO

8. Railroad tracks/ties?

No

9. Generators?

NO

If there are currently or have previously been underground or aboveground storage tanks on-site, see below.

1. Have the tanks been removed? NO

2. How many generations of tanks have there been?

see tank history

3. Please describe the tank age, capacity, historical contents, construction, and leak detection or spill prevention systems.

see tank history

4. Have there been any leaks or releases detected in the past?

see tank history

Waste generation:

3. Who picks up solid waste/waste oil/grease? How often is it picked up?

City of Griffin solid waste previously

4. Where is waste stored prior to pick-up?

N/A

5. Is there an oil/water separator (OWS) on-site? If so, what is the age? Who pumps out the OWS?

NO

Subject: City of Griffin - City Open Records Request ORR2026-66: Completed

Sender is External. Please be careful opening links and attachments.

Dear Requester,

Pursuant to your open records request for the following:

Description of Records Requested: I am currently gathering information for a Phase I Environmental Site Assessment for a commercial parcel in Griffin, Spalding County, Georgia. The subject property is located at 232 E Broad Street in Griffin Spalding County, Georgia (PIN: 014 35005). As part of the assessment, we need to know if there have been any fires at the Site or any leaks/spill of hazardous materials in the vicinity of the Site that may have been recorded at your local fire department or environmental health department. I have included two site maps to help locate the property. Please let me know if you need any additional information. Thank you for your help.

The request Request Number: ORR2026-66 has been completed. Please be advised there is no information responsive to your request. Nothing exists; therefore, nothing is provided.

We consider this request complete and closed.
Thank you,

City of Griffin
100 S Hill St
Griffin, GA 30223

Subject: GORA Request - 232 E Broad Street in Griffin Spalding County, Georgia
Attachments: map-1.pdf; map-2.pdf

Good Morning,

I am currently gathering information for a Phase I Environmental Site Assessment for a commercial parcel in **Griffin Spalding County, Georgia**. The subject property is located **at 232 E Broad Street in Griffin Spalding County, Georgia (PIN: 014 35005).** As part of the assessment, we need to know if there have been any fires at the Site or any leaks/spill of hazardous materials in the vicinity of the Site. Please comment on incidences of spills on the adjacent properties as well. We also request that you provide any available SARA Title III, Community Right-To-Know information, and hazardous materials which may have been filed at your office for the Site listed above or adjacent property. I have included two site maps to help locate the property. Please let me know if you need any additional information. Thank you for your help.

Thanks,

Nicole Camarda

Description	I am currently gathering information for a Phase I Environmental Site Assessment for a commercial parcel in Griffin Spalding County, Georgia. The subject property is located at 232 E Broad Street in Griffin Spalding County, Georgia (PIN: 014 35005). As part of the assessment, we need to know if there have been any fires at the Site or any leaks/spill of hazardous materials in the vicinity of the Site. Please comment on incidences of spills on the adjacent properties as well. We also request that you provide any available SARA Title III, Community Right-To-Know information, and hazardous materials which may have been filed at your office for the Site listed above or adjacent property. I have included two site maps to help locate the property. Please let me know if you need any additional information. Thank you for your help. Thanks, Nicole Camarda Project Geologist 3900 Kennesaw 75 Parkway, Suite 100, Kennesaw, GA 30144 770.425.0777 (office) | 470.316.6614 (mobile) | usanova.com (web)

Dear Nicole Camarda ,

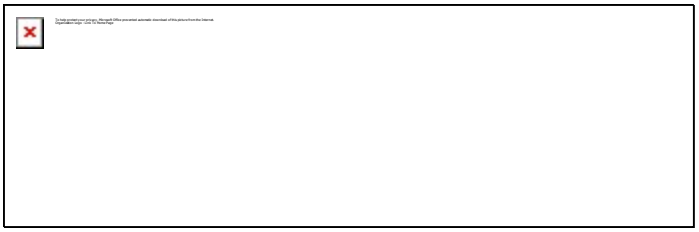

This response is to your request received via e-mail on 02/10/2026, for access to records under the Georgia Open Records Act (GORA). Specifically, you requested access to records for the following:

Location: 232 E Broad Street, Griffin, Spalding County, Georgia
Facility Name and/or Permit Number: Unknown
Date Range of Records Requested: Any
County: Spalding
Description of Request: Good Morning, I am currently gathering information for a Phase I Environmental Site Assessment for a commercial parcel in Griffin Spalding County, Georgia. The subject property is located at 232 E Broad Street in Griffin Spalding County, Georgia (PIN: 014 35005). As part of the assessment, we need to know if there have been any fires at the Site or any leaks/spill of hazardous materials in the vicinity of the Site. Please comment on incidences of spills on the adjacent properties as well. We also request that you provide any available SARA Title III, Community Right-To-Know information, and hazardous materials which may have been filed at your office for the Site listed above or adjacent property. I have included two site maps to help locate the property. Please let me know if you need any additional information. Thank you for your help. RE: L2026-461
Submitted on: 02/11/2026

Dear Nicole Camarda,

Open Records Request Number: L2026-461 has been completed. The Georgia Environmental Protection Division's **Land Protection Branch has identified records potentially responsive to your request**. To review the potentially responsive records, please submit a file review request to the applicable office as detailed below to schedule an appointment.

The potentially responsive records identified include:

Georgia EPD's Tradeport Office:

4244 International Parkway, Suite 104, Atlanta, GA 30354

Please submit your file review request to Tradeport.FileReview@dnr.ga.gov.

Underground Storage Tank (UST) Program

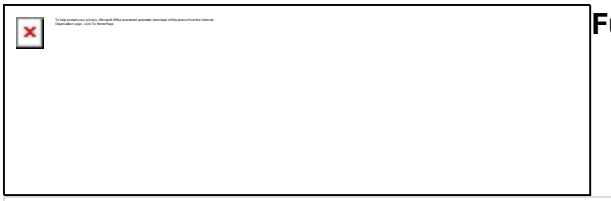

Possible Record(s) found include –

We have UST records for this location; the location identifier is 9126083.

The Land Protection Branch administers regulatory programs for solid waste, hazardous waste, underground storage tanks, contaminated site cleanups, recovered materials, scrap tires, surface mining, and the disturbance of lead-based paint and asbestos.

Thank you,

Georgia Open Records Coordinator

RE: U.S.T. Closure Report
Spalding County Old Jail Facility
232 East Broad Street
Griffin, GA (Spalding County)
Facility ID 9126083

Dear Mr. Coughlan,

Attached you will find where HydroLogic, Inc. responded to Montemayor request to clarify the discrepancy of the reporting levels. Based on HydroLogic's letter of October 21, 1998 and your October 27, 1998 letter to Mr. Wilson of Spalding County, was this an exercise of fertility for my client and Montemayor?

We very much appreciate you bringing this matter to a conclusion, but, I wonder at times when you make requests like your October 9, 1998 letter you realize the unrecoverable cost that are involved at our end in straightening these matters out.

Sincerely,

Richard Morris
Project Manager

SUBJECT: Underground Storage Tank (UST) Closure Report
Spalding County Old Jail Facility
232 East Broad Street
Griffin, GA; Spalding County
Facility ID: 9126083*Closure

Dear Mr. Wilson:

This is to acknowledge receipt of your Closure Report received July 29, 1998, for our review.

We have conducted a technical review of the Closure Report. The basis for this review are the Closure Report content requirements referenced in paragraph 391-3-15-.11(3) of the Georgia Rules for Underground Storage Tank Management (GUST Rules). EPD Comments are outlined in the enclosure. Please amend the Closure Report to correct these by November 9, 1998. Unless one of the outlined EPD Comments requests otherwise, you are required to only submit your responses to these comments.

If you have any questions, please contact me at (404) 362-2599.

SUBJECT: Underground Storage Tank (UST) Closure Report Response
No Further Action Required:
Spalding County Old Jail Facility
232 East Broad Street
Griffin, GA; Spalding County
Facility ID: 9126083*Closure

Dear Mr. Wilson:

This is to acknowledge receipt of your Closure Report Response received July 29, 1998, prepared by Montemaynor, Inc., for our review.

Based on current requirements of the Georgia Underground Storage Tank Act and the Georgia Rules for Underground Storage Tank Management (GUST Rules) and the data contained in your report, the Georgia Environmental Protection Division (EPD) has determined that, for the current release, **no further action is required at this time.**

However, this site could be subject to further corrective action in the future if mandated through more stringent State or Federal statutory or regulatory changes, if drinking water systems are identified or installed within two miles of the site, if surface water bodies are impacted by any dissolved contamination resulting from this release, or if previously unidentified soil contamination, dissolved contamination and/or free product on groundwater are identified as originating from this site.

If you have any questions, please contact me at (404) 362-2599.

Sincerely,

Michael F. Coughlan

October 27, 1998

MEMORANDUM

TO: Mike Coughlan, Corrective Action Unit II

FROM: Mary Wilson, KEMRON

SUBJECT: Review Information Leading to a NFAR
Spalding County Old Jail Facility
232 East Broad Street
Griffin, GA; Spalding County
Facility ID: 9126083*Closure

KEMRON reviewed the Closure Report for the subject facility. Comments relative to the NFAR determination are as follows:

1. A 10,000 gallon gasoline UST was closed by removal on March 26, 1998.

2. Composite soil closure samples were collected from beneath each end of the UST and from beneath the dispenser and assayed for TPH (418.1), PAH (8310) and BTEX (8020). All samples were BDL. However, TPH detection limits were 25 mg/kg.

3. A Closure Report was received by EPD on April 21, 1998.

4. A deficiency letter was issued July 15, 1998, requesting:

    1) The report indicates "composite" soil samples were collected. Only "grab" soil closure samples are acceptable. Please recollect closure samples beneath each end of the former UST and from beneath the dispenser and have them assayed for TPH-GRO, BTEX, and PAH.

    2) Elevated TPH detection limits were reported for the samples collected. Please require your laboratory to use appropriate detection limits on the samples to be collected.

5. On July 29, 1998, EPD received a letter confirming a conversation with Michael Coughlan. The letter noted that the samples collected were grab samples collected from the backhoe bucket. The letter made no mention of the elevated detection limits for TPH.

6. Even though TPH detection limits are 25 mg/kg, based on the lack of contamination in the other samples, this site is eligible for NFAR status.

Asbestos and Lead Based Paint Inspection, Train Depot, Blue Ridge, GA

Asbestos and Lead Based Paint Inspection, Phase I ESA, Phase II ESA, Groundwater and Soil Sampling, Former Cotton Mill, Jackson, GA

Multi-Family/Mixed Use

Asbestos and Lead Based Paint Inspections, Phase I ESAs, Multiple Office/Retail Facilities, Anchorage, AK

Radon Assessment Multiple Office/Retail Facilities, Atlanta, GA

APPENDIX G

Qualifications of Conclusions

QUALIFICATIONS OF CONCLUSIONS

The findings and opinions presented are relative to the dates of our site work and should not be relied on to represent conditions at substantially later dates or locations not investigated.

The opinions included herein are based on information obtained during the study and our experience. If additional information becomes available which might impact our environmental conclusions, we request the opportunity to review the information, reassess the potential concerns and modify our opinions, if necessary.

Assessments may include interviews, a review of documents prepared by others or other secondary information sources. NOVA has not verified the provided information and has no responsibility for the accuracy or completeness of the information.

Although this assessment has attempted to identify the potential for environmental impacts to the subject property, potential sources of contamination may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas and/or (5) deliberate concealment of detrimental information. It was not the purpose of this study to determine the actual presence, degree or extent of contamination at the site, except as specifically described in the previous sections of this report. This would require additional exploratory work, including supplemental sampling and laboratory analysis.

This report is intended for the sole use of ***City of Griffin.*** The scope of work performed during this study was developed for purposes specifically intended by ***City of Griffin.*** and may not satisfy other user requirements. Use of this report or the findings and conclusions by others will be at the sole risk of the user.

Our professional services have been performed, our findings obtained, our conclusions derived and our recommendations prepared in accordance with generally accepted engineering practices and principals. This statement is in lieu of all other statements or warranties, either expressed or implied.
